(Revolutionary War) Eliot, J. B., Carte du Theatre de la Guerre actuel entre les Anglais et les Troize Colonies Unies de l'Amerique Septentrionale dresssee par J.B. Eliot .... Paris: 1781. 70x54.6 cm. A fine example of J. B. Eliot's map of the United States, the first state of which is generally regarded as the earliest map to include the title "United States" on a printed map, with additional annotations in a contemporary hand. The present example is the second state of the map, with details of the battles fought during the American Revolution from the 'Affaire de Bunker hill 17, Juin', 1775 to the 'Camp du General Washington' in 1781, with a manuscript additions below it noting the 'Surrender of L. Cornwallis 19 Cot. at York river.' Eliot's map, which was drawn from American sources not previously utilized on any printed map, is generally regarded as the first printed map to bear the name of the United States ("Etats Unis"). The map translates from the French as 'Map of the Actual Seat of War between the English and the Thirteen Colonies' of North America, as described by J.B. Eliot, an 'Engineer of the United States.' In an excellent essay on the map by Margaret Pritchard and Henry Taliaferro (Degrees of Longitude, Map 58), the importance of the map and Eliot, its mysterious maker are discussed at greater length. 'The MAP of the theater of war between Great Britain and America by J.B. Eliot is important because
of its title, les Trieze Colonies Unies de l'Amerique Septentrionale, may include the first reference on a map to the United States. The cartographer was identified as Ingenieurs des Etats Unis. On November 15, 1777, the Continental Congress selected 'The United States of America,' as the name of the thirteen colonies that formed a government under the Articles of Confederation. One month later, French authorities learned of the victory at Saratoga and decided to recognize American independence. By January 8, French foreign minister, Charles Gravier, Comte de Vergennes, informed American envoys that France was ready to engage in an alliance. It is not surprising that the name United States was first mentioned on a map published in Paris in 1778.'

The present example of the map is the second state of the map, which includes a slightly revised title and significant additions, primarily in New Jersey and Pennsylvania, in the area around Valley Forge and Trenton. Both states of the map are very rare. We can find no record of the second state of the map appearing on the market at auction or a dealer catalogue. The first state of the map last appeared at a Sotheby's London auction in 1998, where the map was described as one of only 6 known examples. AMPR notes no examples on the market in the past 30 years in dealer catalogs. $18,500.00

DesSilver, however, greatly improved the map to provide the public with an updated view of the city. Compared to Folie’s original of 1794, the growth of the city is evident. Besides having many more references, the intersection of Broad and High (i.e. Market) Streets shows the more familiar Centre Square as layed out by Benjamin Henry Latrobe.” The copy of this map at the Snider Sale in 2008 brought $13,200. 43) (Ohio/Indiana/Illinois/Michigan) Finley, Anthony, Map of the States of Ohio, Indiana & Illinois and Part of Michigan Territory Compiled from the Latest Authorities. Philadelphia: 1827. 42x52 cm. Folding map in original roan folder, title gilt on front. Near mint condition. Trimmed close at the bottom, affecting the imprint line, to fit the map into the folder. The map is from the same plate as the comparable map in Finley's American Atlas. Bright, full color by county. A brilliant copy of an early map of the old Northwest, including a large portion of Michigan with all of Saginaw Bay. Michigan contains only 11 counties. Illinois is largely undeveloped north and east of Springfield, with the southern counties of Fayette, Edgar and Clark extending far into the north. An extension of Edgar County runs northeast to Lake Michigan and includes Chicago and Fort Dearborn. Karpinski 99. Pastedown slip dated 1828. $3,250.00
restored, with modern linen backing. Original rollers. Outline color by state in some places, by county in others. Inset map of Florida. This is among the earliest maps to identify Austin's settlement in Texas. Striking on this map is the large decorative title with a cartouche of an American eagle over it. This is a fine example of an early 19th century American wall map, done in a most decorative style. Lay's maps are all very scarce. Born in 1765, his earliest known map was of the northern portion of New York State, in collaboration with Arthur J. Stansbury. Issues of this map of the United States, first published in 1819, have been seen with dates as late as 1836.

52) (Religious Print) Robinson, Lewis, The Resurrection of Jesus Christ. [Reading, VI]: 1831. 46x70 cm. Very scarce religious print by Lewis Robinson, better known for his cartographic efforts. Presented in the style of a wall map, backed with linen and with wooden rollers top and bottom. Full hand color. Very good condition, with one short crack near the top and bubbling. Mild age-toning. The print depicts Christ rising, having emerged from his tomb, with soldiers recoiling in awe in the foreground. Records of Robinson's business indicate that his salesmen sold 5995 maps, but only 533 prints, which bore his imprint. (See Ristow p. 272.) $700.00

53) (United States) Mitchell, S. Augustus, Travelers Guide through the United States. Philadelphia: 1832. 16mo. Folding map, Very good condition, with small tape repairs at left side of the map. This is the first wholly original publication by Mitchell who began map publishing in 1831 by selling maps and atlases first issued by Anthony Finley. Also important is that this first edition of the Travelers Guide was probably the first American cartographic work to employ steel engraving. A stone work in American cartography. See Ristow p. 304. Thomson 638. $1,500.00

54) (United States) Young, J. H., Map of the United States, Philadelphia: 1833. 111x88 cm. Wall map, with top roller only. Restored, backed with modern linen. Full color by state. Philadelphia: 1835. Folding map in original gilt-stamped leather, spine repaired. Map lined. Scattered staining, relatively heavy at foreedge near the front, generally very good condition. 84, [4] pp. folding map. A fine early guide to American internal improvements, considerably scarcer than Mitchell's Travelers Guide series of the same time period. The map here, entitled Mitchell's Map of the United States; Showing the Principal Travelling, Turnpike and Common Roads, is not the same as was including in the Travelers Guide. It shows roads, railroads and canals, completed and proposed. It shows to eastern Texas and has eight inset maps of the vicinities of major cities at the bottom right. A fine, restored copy of a very scarce map by one of the great overlooked mapmakers of the 19th century. Full color by state. Resembles the Amos Lay U.S., though reduced. Closer examination reveals that these are very different maps. Robinson was based in Vermont and did most of his work there, though

50) (Ohio/Michigan) Finley, Anthony, Map of Ohio and the Settled Parts of Michigan 1830, Philadelphia: 1830. 46x32 cm. Folding map bound into a small notebook, not the usual folder. Clearly, this copy was designed as a pocket map, printed on banknote paper, not as an atlas map. Good condition, with splits at some fold junctions and along two short folds. Full color by county. Shows all of Ohio and the southeastern corner of Michigan. According to Karpinski 109, this is the first edition of this map which was reissued in 1832, 1833 and 1834 for inclusion in Finley's General Atlases. Also bound into this notebook is a copy of Williams' 1830 Map of New York State. $750.00

At the bottom is a ‘Consulting Index to Cooke's New Plan of London, Westminster, and the Borough of Southwark’ which has 21 columns listing streets and buildings. It is very unusual to see a map like this as a wall map. Most often, they are seen as folded maps with slipcases. See Howeego 306, which lists issues of 1827, 1828 and 1830, but not 1829. Howgego gives the title as ‘A New Plan of London ...’, not ‘A New Map ...’ as here. $950.00]

Folding map in original cloth folder, map detached. Separations along some folds, very minor loss in Tennessee. Full color by state. This map clearly depicts the spread of railroads in 1858. Decorative border with a very large, decorative vignette at the lower right with a patriotic motif around the names of the directors and officers of the company. There is also a lovely vignette of a train at the bottom center. The only features shown are rail lines and towns, except in Kansas and Texas. The map shows just the eastern half of the continent. Attached at the lower left is a smaller (14.1x18.8 cm) Rail Road Map of Massachusetts, Connecticut and Rhode Island, by Wm. Perris. It is most unusual to see two maps joined in this way. 171) (Colorado) Rocky Mountain News Printing Co., Cherokee City ... Shares. No. ... Be It Known, That, ... Is the Owner of ... . Denver: 1860. 16.4x26 cm. Map in fine condition, one small stain in bottom margin and a small chip in the top margin. Probably the second state of the first map printed in Colorado. This certificate is made out to John Bell, who was also President of the company. Cherokee City was north of Denver but did not survive for very long, first changing its name to Latham, and then disappearing entirely ten years later. This map was printed by the Rocky Mountain News. Don and Jean Griswold, in Colorado’s Century of Cities, describe the short history of Cherokee City. John Bell, who signed this document and is shown as the owner of the six lots covered by this note, announced that a road would be laid out from Julesburg to Cherokee City, north of the Platte, to allow potential emigrants to bypass the 160 miles of treacherous sand on the south bank of the river. There is a designation of “Gold Mines” along the road which ran between Cherokee City and Denver. A very rare, and important, piece of Colorado history. $5,750.00

There are a couple of very short tears and blemishes in the top couple of inches, otherwise it is extremely bright and fresh. This is among the best copies we have seen of this landmark map of New York State. Very large, colorful and decorative, it was also the definitive map of the state for the remainder of the 19th century. See Ristow, Chapter 22 for an extensive discussion of this map and the whole New York State mapping project of the 1850’s. $1,500.00

177) (United States/Colorado) Johnson & Browning, New Illustrated & Embellished ... Map of Republic. New York: 1860. 177x165 cm. Large wall map, not in Wheat, though similar in content to the smaller Wheat 978. A very important map as it shows the proposed “State of Jefferson or Colona” for a Colorado which is shown in its modern shape. Restored. Excellent condition with original rods. Other interesting boundaries include an east-west line between Arizona and New Mexico, a very early appearance of Nevada which extends into Utah, a territory of Shoshone in what would become southern Idaho and western Wyoming. The title block reads ‘Published by J. H. Colton, 54 William St., New York for Johnson & Browning, Richmond, VA.’ This apparently indicates that the map was actually printed in New York, though the formal attribution is a bit murky. This is among the earliest maps to show Shoshone as well as among the only maps to show the names of both Jefferson and Colona. Overall, a fascinating map showing very volatile names and boundaries in the West. $7,500.00

178) (United States) Mitchell, S. Augustus, New National Map, Exhibiting the United States. Philadelphia: 1860. 159x152 cm. 180) (Michigan) Geil & Harley, Map of Kalamazzo Co., Michigan. Philadelphia: 1861. 120x122 cm. Wall map in very good condition, age-toned, mild chipping near top. Original rods and linen backing. Hand-colored by town. Land owners identified. 11 views and 11 inset town plans, along with three small population and distance tables. On the back is a manuscript notation that this copy was once owned by J. C. Magill, a major real estate broker in Chicago in the 1870’s. This map, of the northern-most county in New Hampshire, is probably the rarest of the county maps of New England produced by Walling. Only one copy is recorded in Antique Map Price Record as having been offered in the past 25 years. Cobb (Maps of New Hampshire) 264 calls for only 10 inset plans, indicating that there may well be different states of this map as there are of many other county maps of this period by Walling. While worn, this is a quite serviceable copy of this very rare map. $2,500.00

Includes lines through lower Ontario between Buffalo and Detroit with spurs to Toronto and Guelph. Dated November 1, 1865, this is among the earliest examples of this genre of timetable maps. Well under a year after the end of the Civil War, the map shows the entire South and its rail system. There are also a number of towns or railroad stations here, particularly in the Chicago area, which do not appear on the 1864 map. The back cover has a view of the institution at Versailles Mineral Springs, Illinois. Very rare, both for its small ephemeral nature and its status as a pre-fire Chicago imprint.
